M² Consulting

M2 Consulting provides value-added services to facility owners and operators to ensure cost effective and high quality operations and maintenance functions. Services include maintenance strategy and process development; CMMS planning, selection and implementation; outsourcing opportunity evaluation, specification writing review and vendor evaluation. M2 Consulting, although begun in 1998, has become a leader in Facility Management Consulting and Application Hosting.

M2 Consulting also provides a leading EAM software in a hosted environment.
